Experience

Honeyfields Artistry - *Software Developer* - March 2019 - May 2019

- Developed a full functioning e-commerce store with filtering system, item search, and custom order features
- Created protected routes that allows admins to toggle edit view and have CRUD (Create, Read, Update, Delete) implementation for all store items, store filters, and upcoming events
- Programmed sold item pinboard that generates the last 40 items and can also omit items based on the store filters
- *HTML5; CSS3; Javascript; ReactJS; GraphQL; NextJS; Prisma Yoga; Apollo Client*

Youth Theatre Works - *Software Developer* - October 2018 - January 2019

- Engineered user accounts with nested sub accounts to register children to productions allowing only admins and parents access to allergies, shirt sizes, and personal information of the child
- Renovated their communication system by creating mass email system for reminders to subscribed users, update their play home page, or change their rehearsal schedule on the website
- Developed online ticket system allowing admins full CRUD implementation to easily toggle ticket sells on their website
- *Handlebars; NodeJS; Express; MongoDB; Bootstrap*

Wrench Wizards - *Jr. Software Developer* - June 2017- December 2017

- Developed a bid system that allowed users to see the bids from lowest to highest
- Helped redesigned major components of the app
- Streamlined google maps geotag integration for store locator
- *PHP; HTML5; CSS3; MySQL*

Additonal Experience

WhereInTheWorldIsRobertSilva - January 2018- March 2018

- Friend tracking mobile only website the uses meta data from pictures to geotag locations
- *PHP; HTML5; Google Maps; MySQL; Javascript; CSS3*

PDF Generator - June 2019

- Resume Template with PDF generator
- *NextJS; ReactJS; HTML5; CSS3*
